

Print Data

Below you will find brief instructions for checking and preparing files before uploading.

Must be without white background

Important

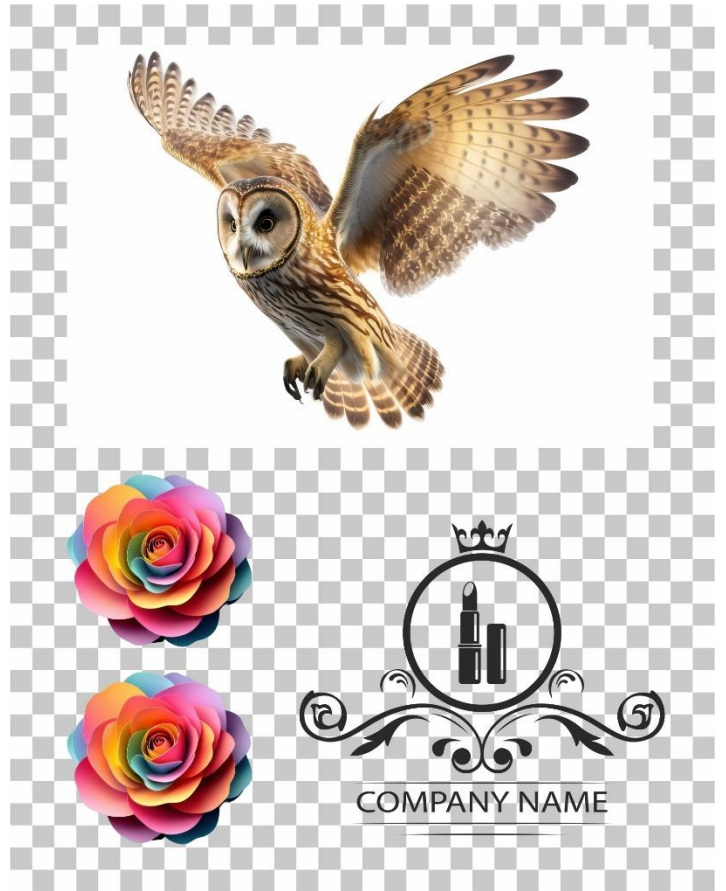

⚠ Important

Your file must not contain a white background. This step is critical for a correct print result.

✔ Correct

✘ Wrong

How to verify data correctly?

1

Insert the print data into CorelDRAW

2

Add a colored background

3

Verify the correctness of the data.

📄 The background must not be tinted white in Photoshop.

📏 Data must be formatted to 56 × 100. Larger formats cannot be printed.
