IRONING GUIDE

Guide for ironing transfers on variety of materials		
Material	Plastisol transfers	Digital transfers (cold peel)
Cotton	165 – 180 ° C	150 – 160 ° C
	10 – 15 Sec.	30 Sec.
	5 – 7 bar	5 bar
Polyester, Nylon	145 – 160 ° C	120 – 130 ° C
	7 – 15 Sec.	40 Sec.
	5 bar	5 bar
It is necessary to put Teflon between heat press and textile (if press doesn't have that option yet)!		
Blended fabric	170 – 180 ° C	150 ° C
	10 – 15 Sec.	30 Sec.
	6 – 7 bar	5 bar
It is recommended to put Teflon between heat press and textile.		
Remove transfer paper not too hot and not too cold; approximately after 10 seconds, when you can hold your hand on the transfer without getting burned. The transparent film is hot peel, please pull evenly.		
Digital transfers – Remove the A-foil when it is completely cold. It is absolutely necessary to fix the transferred design in a heat press.		
These instructions are only recommendations – it is always necessary to try out first!		
Our transfers are not suitable for Spandex.		

WASHING INSTRUCTIONS

If you stick to the following instructions, you can extend shelf life of the print order many times.

1. Please turn the garments inside out before washing.
2. Do not use fabric softener and no heavy-duty detergent.
3. Printed garments wash exclusively with mild detergent at no more than 40 degrees.
4. Ensure the correct dose of detergent.
5. Spin only at low rpm.
6. Do not tumble dry!
7. Turn when ironing inside out, do not iron over the printed area.
8. Do not pull, scratch or tear the prints.

Please note instructions above, because information on the product label for washing and care instructions refer solely to neutral, non-refined product!

If these points are not complied with, no guarantee of durability and color intensity of the printing can be accepted. It is the responsibility of the user to determine the suitability of the information for a particular application.
